

1

00:00:05,280 --> 00:00:09,840

The Senstar LM100 is the world's first
intelligent perimeter lighting and

2

00:00:09,840 --> 00:00:14,730

sensing solution. The luminaire combines
high-performance LED lighting with

3

00:00:14,730 --> 00:00:20,189

intrusion detection sensors. A powerful
deterrent the LM100 detects and

4

00:00:20,189 --> 00:00:26,189

illuminates intruders at the fence line
simple to install the Senstar LM100

5

00:00:26,189 --> 00:00:30,240

enhances your perimeter security, while
saving you money by reducing operational

6

00:00:30,240 --> 00:00:35,579

costs and protecting against break-ins.
The LM100 is designed to protect any

7

00:00:35,579 --> 00:00:39,719

property or site with perimeter security requirements. It can be used as a

8

00:00:39,719 --> 00:00:45,170

standalone system or in conjunction with CCTV cameras and other security products

9

00:00:45,170 --> 00:00:50,219

uniform illumination of the fence line helps CCTV cameras to avoid bright spots,

10

00:00:50,219 --> 00:00:54,770

while high color rendering index LEDs ensure colors are not washed out.

11

00:00:54,770 --> 00:01:00,449

Built-in sensors notify your security system of any attempt to cut, climb, lift

12

00:01:00,449 --> 00:01:05,880

or break the fence fabric. The lights can follow a pre-programmed schedule as well

13

00:01:05,880 --> 00:01:09,640

as turn on or strobe whenever intrusion attempts are detected.

14

00:01:09,640 --> 00:01:14,300

Wireless networking eliminates the need to install communication cabling along the

15

00:01:14,310 --> 00:01:18,390

fence. It forms a self-healing mesh ensuring that the system remains

16

00:01:18,390 --> 00:01:23,920

operational if some of the luminaires are damaged. A low-voltage device, the LM100

17

00:01:23,920 --> 00:01:28,020

is easy and safe to install, and the downward directed coverage pattern

18

00:01:28,020 --> 00:01:33,270

minimizes light pollution. Using only 2.5 watts per luminaire the ultra

19

00:01:33,270 --> 00:01:38,640

energy-efficient LM100 reduces
electricity costs by as much as 95% when

20

00:01:38,640 --> 00:01:41,600

compared to other security lighting
products.

21

00:01:41,600 --> 00:01:46,130

Built by Senstar, the world leader in
perimeter intrusion detection systems

22

00:01:46,130 --> 00:01:50,839

the Senstar LM100 combines two
security technologies into a single

23

00:01:50,840 --> 00:01:56,890

system. It is an affordable effective way
to protect any property.
