

1

00:00:00,030 --> 00:00:02,029

2

00:00:02,889 --> 00:00:08,009

A fence around the perimeter of a secured site is only a minor deterrent for determined intruders.

3

00:00:08,320 --> 00:00:12,540

The FlexZone fence sensor brings intrusion detection out to the perimeter,

4

00:00:12,880 --> 00:00:18,119

protecting against trespassing vandalism and theft while helping to meet security requirements.

5

00:00:18,640 --> 00:00:21,720

FlexZone is a fence-mounted perimeter intrusion detection system

6

00:00:22,090 --> 00:00:28,080

that detects and locates attempts to cut climb or otherwise break through a perimeter fence.

7

00:00:28,810 --> 00:00:34,739

FlexZone combines many of the most advanced security features into a single cost-effective solution.

8

00:00:35,200 --> 00:00:40,319

Unlike less advanced solutions on the market, FlexZone uses software-defined zones.

9

00:00:40,989 --> 00:00:43,529

Each processor supports up to 60 zones,

10

00:00:44,110 --> 00:00:48,179

all independently adjustable and readily integrated with cameras for complete coverage.

11

00:00:48,730 --> 00:00:56,339

FlexZone covers 2,000 feet or 600 meters per processor and locates intrusions within 10 feet or 3 meters,

12

00:00:57,219 --> 00:01:03,119

industry-leading performance at a fraction of the cost. The system provides security staff with enhanced

13

00:01:03,430 --> 00:01:06,629

situational awareness and precise camera pointing capabilities.

14

00:01:07,150 --> 00:01:10,199

FlexZone uses adaptive algorithms to detect

15

00:01:10,540 --> 00:01:15,569

simultaneous intrusion attempts while filtering out noise from environmental conditions like wind or rain,

16

00:01:16,210 --> 00:01:21,628

virtually eliminating nuisance alarms that may overload the ability of the security staff to respond.

17

00:01:22,030 --> 00:01:27,960

FlexZone can be installed on almost any fence type including chain-link welded mesh and palisade.

18

00:01:29,350 --> 00:01:33,600

Installation is simple: with FlexZone a single cable carry sensor data,

19

00:01:33,790 --> 00:01:38,849

networking and power and can be quickly installed on the fence by non specialized personnel.

20

00:01:39,549 --> 00:01:43,828

Ruggedized for the outdoors, FlexZone works even in the most extreme weather conditions.

21

00:01:44,770 --> 00:01:51,929

FlexZone is compatible with more than 20 third-party solutions and is easily added to any existing security system.

22

00:01:52,570 --> 00:02:00,000

Part of a comprehensive portfolio of security products, FlexZone is backed by worldwide technical support

23

00:02:00,280 --> 00:02:02,280

from a security company trusted for over 35 years.

24

00:02:03,100 --> 00:02:04,869
